

We're Glad You're Here!

We Know School Districts

We believe the people building tomorrow's leaders deserve a champion today. Our cost-effective, proactive approach to workplace safety and ongoing commitment to timely claims resolution help our members live safer and more secure lives.

ABOUT SDIC

Enriching Schools, Students and

Staff in Nearly 100 School Districts

By providing the many school districts we serve – including approximately 50,000 employees – with an all-inclusive claims management program, we help school administrators focus more of their time, efforts, and budget on enhancing programming – ultimately enriching our schools, our youth, and our communities.

A Self-Insured Trust by and for School Districts

We know school districts. We understand their challenges, their unique needs, and the diverse people who make them thrive. Our services and solutions are not only designed specifically for school districts – but also customized to the unique needs of *your* school district.

Superior Claims Management

We have the expertise and services of a larger firm, but the personal service and attention to detail you would expect from a local partner. Our team members carry lower case loads than the industry standard – so you can count on personalized service and a quick resolution – every case, every time.

A Proactive Partnership

While most carriers offer risk management, because of our personal approach, we can flag issues faster and more accurately – saving costs and, more importantly, identifying ways to prevent injuries from happening in the first place.
